

Notes of the meeting held on 11/01/2022

Present: Andrew Richardson (LCC), Chris Procter (LCC), Cllrs Linda Richards & Mike Corrigan

- The Viasis Mini is the only SID available for placement in permanent positions under current legislation. All SIDs placed by LCC Highways are currently of the same make and design – **Viasis Mini** with the speed and smiley green or red face displayed. SIDs with message logos are regarded as a separate type of signage (not simply an information sign) which should not be placed for more than two weeks in any one place at any one time unless subject to a specific order.
- Lighting columns on Bowcliffe Road, Clifford Road and Wetherby Road have been identified for optimum positions and ability to reverse the units if required.

The cost to reverse the unit is £60.00.

In addition:

- The change of position of the 20mph zone markers on Bowcliffe Road has been ordered and the reverse will state 40mph not 30mph as at present, because of the junction with Paradise Way (40mph speed limit).
- The changes at the 4 way junction (Windmill Road, Toulston Lane, Aberford Road and Vicarage Lane) are awaiting the statutory TRO before work can commence.
- The extension of the yellow, no parking line, at the bus stop at the junction of Lyndon Road and Clifford Road is being followed up by Highways because the requisition was placed before Christmas.
